

Name: _____ Date: _____

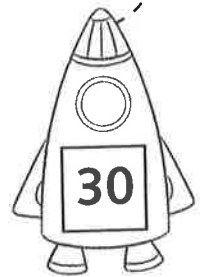

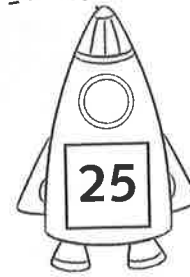

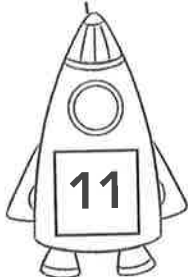

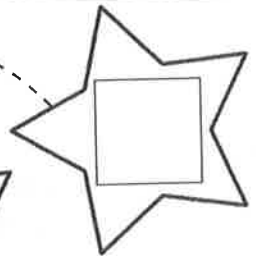

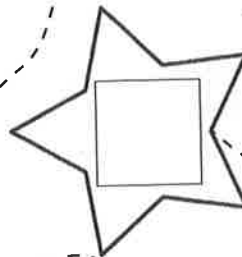

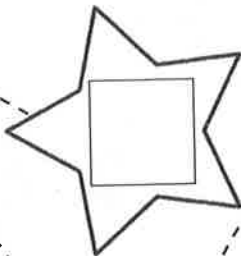

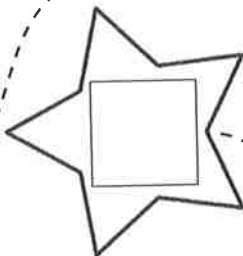

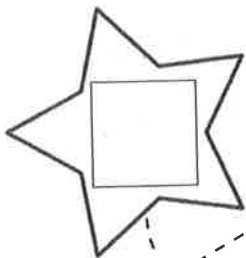

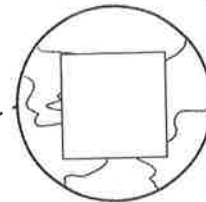

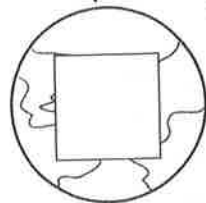

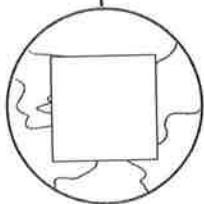

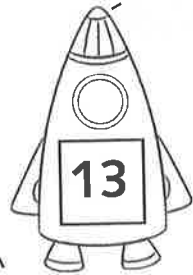

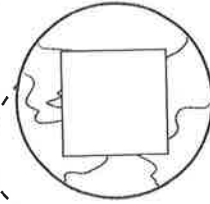

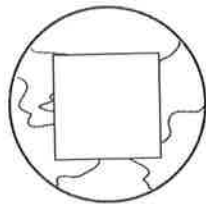

Add 10, take off 10

Add or subtract 10 to or from a number

You will need:

- coloured pencils

What to do

- At the top of the sheet, look at each spaceship in turn and ask your child to say the number that is 10 more than the number shown. They use a coloured pencil to follow this rocket's flight to a planet, and write their answer onto the planet. Use a different colour for each rocket.
- At the bottom of the sheet, look at each rocket about to take off, and ask your child to subtract 10 from the number shown on each one. Use a different colour to follow each rocket's route to a star, and write the answer in the space.

Look for numbers less than 50 at home or out and about and ask your child questions such as:
"What number is 10 more than this number? Add 10 to this number. Subtract 10 from this number.
Which number is 10 less than this one?"
