

## DT Victorian Samplers

You have your packs with your designs, binca, reference sheets for additional ideas.

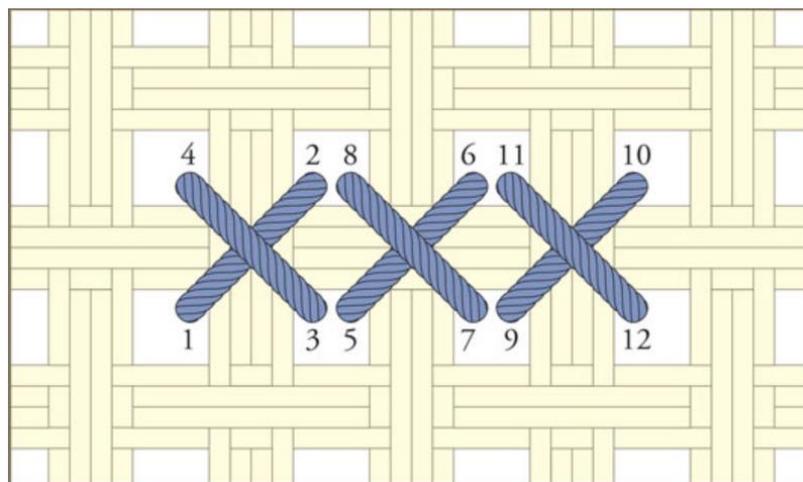

Here's a reminder of how to cross stitch.

### Full cross stitches

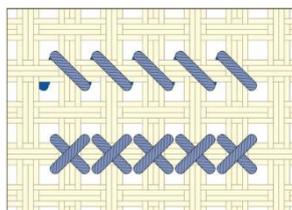

Don't forget to tie a knot and also, thread back under (H) when you finish.

Remember that all the crosses should go the same direction.

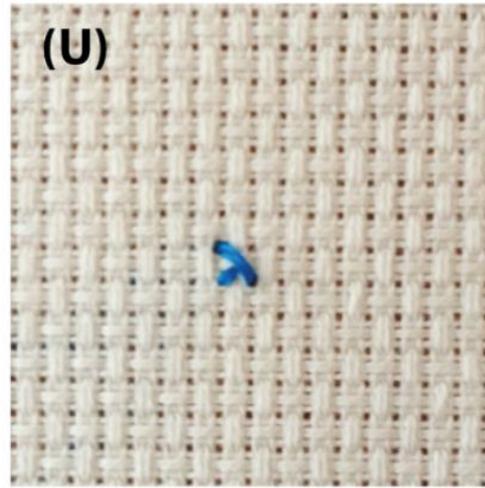

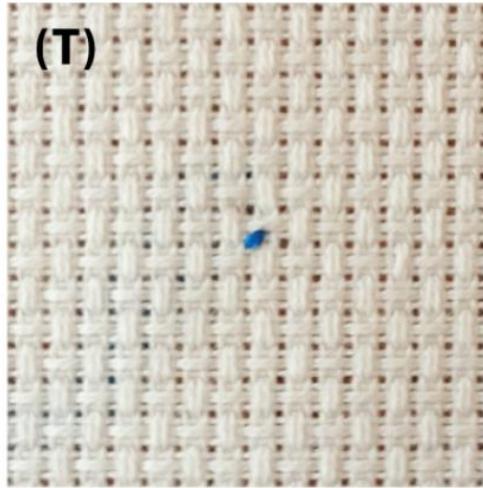

Here's the mathematical approach!

Sew one direction, then the other.

Half stitches if you would like to make your shapes/animals etc more lifelike.

#### Half-stitches

Bring the thread up through the Aida and back through the centre of the square, this creates the first part of the half stitch (T). Then bring the thread up through the corner of the square and back through the opposite corner, finishing the half stitch (U).
