# Division using the formal written method

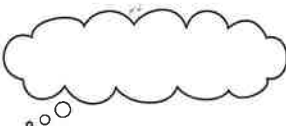

Use the formal written method to calculate  $TO \div O$

Estimate the answer first then use the formal written method to work out the answer to these calculations. Check your answer using the inverse operation.

1  $75 \div 5 \rightarrow$  

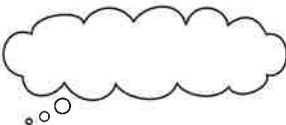

T	O

T	O
x	

2  $64 \div 4 \rightarrow$  

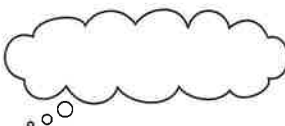

T	O

T	O
x	

4  $45 \div 3 \rightarrow$  

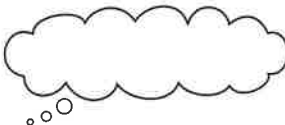

T	O

T	O
x	

3  $56 \div 2 \rightarrow$  

T	O

T	O
x	

5  $56 \div 4 \rightarrow$  

T	O

T	O
x	

## Example

Estimate:  $72 \div 3 \rightarrow$  

T	O
2	4
3	7 12

T	O
2	4
x	1 3
	7 2
