# Make 600

Subtract 3-digit numbers using the formal written method of column subtraction

You will need:  
• 0–9 dice

- 1 Roll the dice and fill in the 100s, 10s and 1s digits in the calculations below. Make sure the top number is the larger of the two numbers.

Think about how to make your target number of **600**.

When the digits are filled in, work out the calculation.

Are you near your target?

**a**

	H	T	O
-			

**b**

	H	T	O
-			

**c**

	H	T	O
-			

**d**

	H	T	O
-			

**e**

	H	T	O
-			

**f**

	H	T	O
-			

**g**

	H	T	O
-			

**h**

	H	T	O
-			

**i**

	H	T	O
-			

**j**

	H	T	O
-			

**k**

	H	T	O
-			

**l**

	H	T	O
-			

- 2 Which calculation is nearest to 600?  
How did you decide where to put the digits?
