

## LESSON 1

### Lesson 107 Calculating areas of triangles

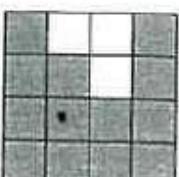

- 1** a  $27 \text{ cm}^2$  b  $72 \text{ cm}^2$  c  $32 \text{ cm}^2$  d  $35 \text{ cm}^2$   
**2** a  $10 \text{ cm}^2$  b  $5 \text{ cm}^2$  c  $7.5 \text{ cm}^2$  d  $2.5 \text{ cm}^2$   
**3** a  $13 \text{ cm}^2$  b  $10 \text{ cm}^2$  c  $12.5 \text{ cm}^2$

### Puzzle time

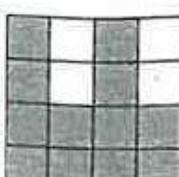

a and b

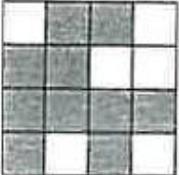

$$\text{Area} = 11 \text{ cm}^2$$

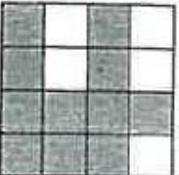

$$\text{Area} = 13 \text{ cm}^2$$

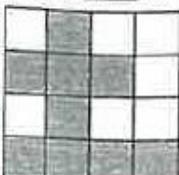

$$\text{Area} = 12 \text{ cm}^2$$

$$\text{Area} = 10 \text{ cm}^2$$

$$\text{Area} = 11 \text{ cm}^2$$

$$\text{Area} = 9 \text{ cm}^2$$

## LESSON 2

### Lesson 106 Calculating areas and perimeters

- 1** a  $152 \text{ cm}^2$ ,  $56 \text{ cm}$  b  $144 \text{ cm}^2$ ,  $70 \text{ cm}$   
c  $450 \text{ cm}^2$ ,  $104 \text{ cm}$   
**2** a  $62 \text{ m}^2$  b  $149 \text{ m}^2$   
**3** a  $900 \text{ cm}^2$  b  $800 \text{ cm}^2$  c  $1050 \text{ cm}^2$   
**4**  $9180 \text{ cm}^2$        $4860 \text{ cm}^2$   
13 stripes in  $78 \text{ cm}$ ; each stripe is  
 $(78 \div 13) \text{ cm}$  high =  $6 \text{ cm}$   
3 of the red stripes are  $150 \text{ cm}$  long;  
4 of the red stripes are  $(150 - 60) \text{ cm}$  long  
So area of red stripes  
 $= (3 \times 150 \times 6) + (4 \times 90 \times 6)$   
 $= 2700 + 2160 = 4860 \text{ cm}^2$

$$\text{Area} = 11 \text{ cm}^2$$

$$\text{Area} = 14 \text{ cm}^2$$

$$\text{Area} = 9 \text{ cm}^2$$

c No. The maximum perimeter of a shape comprising nine  $1 \text{ cm}^2$  squares is  $20 \text{ cm}$  (squares arranged in a line). Therefore it is not possible to make a shape with a smaller area that has a perimeter of  $20 \text{ cm}$ .

## LESSON 4

### E2, L13 Pond borders

c, d

Length of side of pond (m)	1	2	3	4	5
Number of slabs	8	12	16	20	24

1 b

Length of side of pond (m)	1	2	3	4	5
Number of slabs	8	12	16	20	24

$$\text{c } S = 4P + 4 \text{ or } 4(P + 1)$$

$$\text{d } 36 \text{ slabs}$$

$$\text{e } 36 \times £7.95 = £268.20$$

$$\text{2 a, b } 18 \times £7.95 = £143.10$$

$$\text{3 a, b } 18 \times £8.49 = £152.82$$

$$\text{1 } 4 \times 18 = 72 \text{ slabs}$$

$$16 \times 18 = 288 \text{ slabs}$$

## LESSON 3

### Lesson 108 Investigating area and perimeter

- 1**  $125 \text{ cm}^2$   
**2** a  $84 \text{ m}^2$  b  $5 \text{ m}$   
**3** a  $120 \text{ cm}^2$  b  $80 \text{ cm}$   
**4** a  $333.6 \text{ cm}^2$  b  $131.4 \text{ cm}$
